

Usha Rani

Frontend Web Developer

Work Experience

Open Source React.js Developer, Curious Ecosystem

Jan 2024 - Present

- As an Open-Source ReactJS Developer and Frontend Web Developer at Curious Ecosystem, I directed the development of the resume-builder project, overseeing a team of 5 developers, and implementing structured data storage in Redux, resulting in a 100% improvement in data management efficiency and overall performance.
- Leveraging my design and React expertise, I made significant contributions to the project's success.
- One of the key achievements was implementing structured data storage in Redux, significantly enhancing data management efficiency and overall performance.
- In addition to my technical contributions, I assumed leadership responsibilities by guiding and mentoring team members.
- By fostering a collaborative environment and aligning our efforts with organizational goals, we successfully delivered the project on time, meeting stakeholder expectations.
- As a result of my leadership and technical prowess, I garnered recognition for my contributions to the project.

Projects

Portfolio Website: | React, React Router, Tailwind CSS

- I designed and constructed a dynamic portfolio website showcasing my projects and work.
- Utilizing small animations and visually appealing design elements, I aimed to create an engaging experience for visitors.
- The website incorporates responsive design principles, ensuring seamless access across various devices.

Resume Builder Project:

- In this project, I crafted a user-friendly application enabling users to create professional resumes from scratch.
- By implementing multiple customizable templates and seamless data storage using Redux, I provided users with extensive customization options.
- The integration of download functionality allows users to generate and download resumes in various formats, enhancing usability and convenience.

Note: "Add your Resume" functionality for the Resume Builder Project is currently in progress.

Chat-Verse Project: chat-verse-live-link

- Developed with React, Firebase, and Firestore, the Chat-Verse project offers real-time chat functionality for instant communication.
- With features such as privacy settings, message deletion, and media/file sharing capabilities, the platform ensures secure and seamless communication.
- Performance optimization techniques, including image compression and error handling, contribute to a smooth user experience across all devices.

Skills

Technical Skills

- HTML
- CSS
- JavaScript
- Tailwind CSS
- React
- AJAX
- JSON
- Firebase
- React Router
- Redux Toolkit
- Git
- REST API
- Performance Optimization

Soft Skills

- Collaboration
- Leadership
- Effective Communication
- Problem-Solving
- Adaptability
- Time Management
- Attention to Detail
- Creativity
- Critical Thinking
- Empathy
