

Java script interview questions

- 1.what is Iterator pattern or generator function?
- 2.YIELD keyword ?
- 3.Execution context ?
- 4.Callbacks?
- 5.The scope chain, scope, lexical environment ?
- 6.what is temporal dead zone ?
- 7.Let ,const, declarations hoisted ?
- 8.What is difference between syntax error and reference error ?
- 9.difference between Let, const and var ?
- 10.wht is anonymous function ?
11. first class function ?
- 12.function statement vs function declaration vs arrow function vs named function expression ?
- 13.difference between parameters and arguments ?
14. pure function ?
15. higher order function ?
16. callback function and callback function parametrs ?
- 17.promises ?
- 18.what is async/await ?
- 19.what is express and what are the key features ?
- 20.what is middleware in express.js and how its used ?
- 21.handle express in express.js ?
- 22.difference between monolithic and microservice architecture ?
- 23.what is agile ?
- 24.wht is API ?
- 25.Reatful API ?
- 26.JSON ?

27. what is XML ?
28. difference b/w JSON and XML ?
29. What is event emitter in node js ?
30. NPM ?
31. Modules in node js ?
32. package.json ?
33. security based practices for node js Backend application ?
34. Session and cookies ?
35. difference between Undefined and NULL ?
36. spread and rest operator ?
37. Difference between SQL and NO SQL?
38. FUNCTION/METHOD overloading ?
39. draw back of NOSQL database ?
40. javascript data type ? pass by value ? pass by reference ?
41. call, apply and bind method ?
42. shallow copy and deep copy ?
43. Synchronous and Asynchronous in javascript ?
44. how to handle errors in node js ?
45. which is the first argument typically passed to a node js callback handler ?
46. How does node js support multi-processor platforms and does it fully utilize all processor resources ?
47. How to handle child threads in node js ?
48. what is closure in javascript ?
49. What is javascript object prototype?
50. what is the purpose of Buffers class/module/method in node js ?
51. what are key features of node js ?
52. what are the various timing features of node js ?
53. difference b/w authentication and authorization ?
54. JWT token ?
55. access and refresh token ?

56.node js reactor pattern and event loop ?

57.How node js support concurrency ?

58.Singleton method design pattern in javascript ?

59.IIFE in javascript ?

60.node js modules ?

61.node js stream modules ?

62.SOLID PRINCIPLES :-

1.Single responsibility principles (SRP) ?

2.open/close principles (OCP) ?

3.Liskov substitution principle (LSP) ?

4. interface segregation principle (ISP) ?

5.Dependency inversion principle (DIP) ?

63.wht is cross policy ?

64.THIS keyword ?

65.what is node js features and advantages ?

66.Non-Blocking I/O in node js ?

67.Clustering in node js ?

68.how to handle concurrency in node js ?

69.event driven non-blocking I/O ?

70.Event loop, web APIs, task queue, microtask queue, call stack ?

71.scaling in node js => Application for high traffic loads ?

72.wht kind of web application should be build using node js ?

73.Hoisting ?

74.New features in ES6 ?

75.Memo/Memoization in java script ?

76.Best practicing while writing the code ?

78.How to store sensitive data on data base ?

79.Git hooks ?

80.Momory management in javascript ?

81.Storage engine/MySQL/MongoDb
